AT LAST...APPLE UNVEIL THE NEW iPad

By JONATHAN WEINBERG

Published: 27 Jan 2010

APPLE has finally taken the wraps off their most anticipated product ever - a powerful touchscreen computer called the iPad.

1 The tablet PC looks like a large iPhone and can be used to watch films, store photos and browse the web. Unveiling it in San Francisco, Apple guru Steve Jobs said the 9.7 inch device was a "third category" between smartphones and laptops.

He said: "What this device does is extraordinary. It is the best browsing experience you have ever had."

It has been designed for browsing the internet, checking emails, viewing photos, watching videos, playing music and games and reading eBooks.

The high quality screen can be flipped to display content vertically or horizontally and features a touchscreen keyboard with large buttons for easy typing, which Jobs promised would be highly responsive.

The machine will also come with the iTunes store built in allowing owners to listen to music and download it directly to the memory.

And the high-definition display will be perfect for streaming videos from YouTube over its wireless internet connection or viewing hit movies downloaded from iTunes itself.

At just half an inch thin, the iPad weighs just over half a kilogramme (1.5lbs).

Jobs also claimed to have improved battery life on the new machine, saying: "We've been able to achieve 10 hours of battery life - I could fly from San Francisco to Tokyo and watch video the whole way on one charge."

He also claimed it will last a month on standby.

Like the iPhone and touch, the iPad will also run the tens of thousands of applications in Apple's App Store, allowing users to play games and check social networks like Facebook and Twitter.

Popular apps like Brushes, which allows you to paint pictures ***as if*** you were using real watercolours or oils, has also been upgraded for the larger screen.

Apple have also created the new iBook Store allowing thousands of novels from top publishers like Harper Collins to be bought and read on the device, all displayed on a virtual bookshelf.

It follows moves by the likes of Amazon, Sony, Samsung and British firm Cool-er in making eBook readers but until now these had come with black and white screens.

But Jobs conceded: "Amazon has done a great job of pioneering this... we're going to stand on their shoulders for this."

Kat Hannaford of gadget site Gizmodo.com said: "It looks like most people expected but the biggest shock is that it can be used as a normal laptop, and typed on with both hands, instead of using thumbs like you would with an iPhone.

"The operating system isn't too much of a step away from the iPhone's, ***so*** it will feel very familiar to users.

"But the biggest excitement will be around the new apps bred for the platform, which should prove more innovative than anything we've seen on the iPhone before."

Stuart Miles, editor of Pocket-Lint.com, added: "This is an iPod Touch XL. It looks shiny, and has plenty of potential, and seems to be the device that will take Apple into every industry going."

Jobs also announced some models would have a built-in 3G connection for an always-on internet signal like a mobile phone.

A 16GB iPad will cost £308, £370 for the 32GB and \$494 for 64GB. 3G models are an extra \$80.

The device is expected to be available in the UK by June.

DE SISTEMAS E SUPORTE E OPERAÇÃO**

- 31- According to the text, it is correct to affirm that
- A) iPad is an amazing machine that will be available soon.
 - B) Most people expected such dreadful device.
 - C) The author of the text warns the readers about the drawbacks an iPad represents.
 - D) There is no resemblance between iPad and iPhone.

- 32- It can be inferred from the text that
- A) APPLE is releasing a fantastic device which breeds new apples for the platform.
 - B) The iPod Touch XL has scarce potential.
 - C) The operating system is not so developed, which will make users very confident in using it.
 - D) Apple guru Steve Jobs bared the new iPad in San Francisco.

- 33- From the text, the underlined word that expresses the correct reference is
- A) "it" refers to the "*machine*".
 - B) "which" refers to "*keyboard*".
 - C) "that" refers to "*Apple*".
 - D) "which" refers to the "*the new apps bred for the platform*".

- 34- Which alternative contains a correct correspondence meaning between the **boldtyped words**?
- A) "The high quality screen can be **flipped**"; "**flipped**" and **toss** are *antonyms*.
 - B) "Apple have also created the new iBook Store allowing thousands of **novels**"; "**novels**" cannot be replaced by **new**.
 - C) "...instead of using **thumbs**"; "**thumbs**" can be replaced by **thurifer**.
 - D) "Popular **apps** like Brushes..."; "**apps**" cannot be replaced by **applications**.

- 35- The following extracts were taken from the article **AT LAST...APPLE UNVEIL THE NEW iPad**, published in January 27th, 2010.
The extract that is aligned with the information found in the text is

- A) Harper Collins bought thousands of novels from Apple.
- B) The high-definition display will be barely perfect for streaming videos from YouTube.

- C) The operating system of iPad is a little more advanced than iPhone's.
- D) The iPad weighs just over 1.5kg.

- 36- The expression in **bold type** and the item in parenthesis are semantically equivalent in

- A) "Apple has finally taken the **wraps off** their most anticipated product ever..." (uncover)
- B) "The operating system isn't so much too much of a **step away**..." (hinder)
- C) "It looks shiny, and has plenty of potential, and seems to be the device that will **take Apple into** every industry going..." (hurdle)
- D) "The iPad will also **run** the tens of thousands of applications in Apple's App Store..." (rotten)

- 37- The main purpose of the text is to
- A) report some awful tasks that the iPad can perform.
 - B) list all advantages and drawbacks of the new device.
 - C) present a new computer machine, with its advantages and prices.
 - D) persuade the reader to buy different iPods.

- 38- The **discourse marker** that expresses accurate idea in parenthesis is
- A) "**Like** the iPhone and touch..." (comparison)
 - B) "**...as if** you were using real watercolours or oils..." (reason)
 - C) "**...but** until now these had come with black and white screens." (exception)
 - D) "**...so** it will feel very familiar to users." (addition)

- 39- Which assertion is in accordance with the messages revealed in the text?
- A) A touchscreen keyboard with large buttons for easy typing must be very responsible.
 - B) The screen can be larger if the users paint pictures using real watercolours.
 - C) Harper Collins is a common publisher which has bought and displayed novel iPads.
 - D) According to Stuart Miles, iPod Touch XL looks bright and has lots of potential.

- 40- Which statement is adjusted to the ideas presented in the text?
- A) According to Kat Hannaford of gadget site Gizmodo.com, most people expected much more which has caused a great shock.
